

# **Random Designer**

## **Created from Chaos to Connect with the Creator**

*Random Designer* is a story of a loving and caring Creator who miraculously harnesses the random chaotic forces of nature to accomplish His ultimate purposes. And now, after faithfully laboring for billions of years to bring His creation to an awareness of Himself, He calls to us from the deepest recesses of our minds. Will we hear His voice?

### **You Have Heard It Said...**

**You have heard it said** that science and religion are enemies.

**But I tell you** that science and religion have a common goal – the search for truth.

**You have heard it said** that God created the world 6,000-12,000 years ago.

**But I tell you** God has revealed that five billion years is a closer approximation.

**You have heard it said** that the Second Law of Thermodynamics, which funnels everything in our world toward randomness, precludes the existence of life.

**But I tell you** that in the most miraculous way, the God-ordained Second Law of Thermodynamics makes all life possible.

**You have heard it said** that evolution is but a weak unsubstantiated theory.

**But I tell you** this claim insults God's intelligence and creativeness. Evolution is His tool to establish and nurture all life.

**You have heard it said** that evolution devalues human beings.

**But I tell you** evolution ensures that each person is genetically unique and special in the eyes of the Creator.

**You have heard it said** that creation science and evolution must be given equal status in public science education.

**But I tell you** creation science is not science.

**You have heard it said** that death and physical suffering were non-existent before Adam and Eve's disobedience.

**But I tell you** that over hundreds of millions of years, death has always gone hand in hand with life.

**You have heard it said** that literal Christian fundamentalism has a corner on God's truth.

**But I tell you** this is not the truth – God says laws over relationships lead to utter emptiness.

**You have heard it said** that life could not have resulted from mindless natural laws.

**But I ask you** by what authority do you call God's natural laws mindless?

**You have heard it said** that the distinctive feature of human beings is the capability of self-awareness.

**But I say** the highest distinction of humans is the capability of God awareness!

**You have heard it said** that God inhabits a place far away.

**But I tell you** He is never away: The kingdom of God is within us!

**You have heard it said** that the primary goal of life is physical survival.

**But I tell you** the primary goal of life is to connect with the Creator, and the greatest spiritual rewards are reserved for those who are earnestly seeking Him.
